MEMORANDUM FOR: National Foreign Intelligence Board

SUBJECT : DCI Exceptional Intelligence Analyst Program

- 1. Five years ago, the DCI Exceptional Intelligence Analyst Program was created to improve the quality of intelligence analysis by giving promising midcareer professionals the opportunity to personally tailor a project to sharpen their analytical skills and provide for their professional development. Projects have included sabbaticals at home or abroad, university study, independent research, or temporary assignments to other government agencies.
- 2. The Program is administered by the Intelligence Community Staff's Planning and Policy Staff in close collaboration with your agencies. Projects can last up to two years and all special expenses are underwritten by the Intelligence Community Staff. Salaries are the responsibility of the analysts' parent organizations. In the past, approximately 15 professionals participated annually at an average cost of per person.
- 3. I am committed to improving intelligence analysis and, having reviewed the Exceptional Analyst Program and related programs, am convinced that this program can be improved. While the benefits of the present program are obvious, I also would like more analysts to participate, for shorter periods, with more focus on issues of immediate importance and concern. Therefore, I also welcome proposals for projects of shorter duration, and I have asked the IC Staff to respond flexibly to these ideas when they are received. Further guidance will be provided about this year's program through a brochure which will be sent to your training offices.
- 4. I strongly urge each of you to nominate your best people; their absence eventually will pay off handsomely in the new perspective, creativity, and knowledge they bring back to their work.

William J. Case

about streaml your comments First, I supp like it to be on the order innovative pr bureaucratic would be to m until we get proposals. I that come out them merit ou like the IPC which can be through next	ini: and ort adi of odu and ake to al rs to all yea	ou for your thoughts on

2. With respect to the Exceptional Intelligence Analyst program, I accept your point that it is a program for the development of individual analysts and that a competitive annual selection process is fully appropriate. But I am also most anxious to assure that shorter term, less ambitious proposals with potential for developing our analysts are given an equal opportunity to compete. It seems to me there are lots of ways we can use this program to improve the skills and capabilities of our analysts in shorter time periods. I have signed the memorandum to the NFIB principals to get this underway and I would like you to circulate specific implementing instructions to convey my sense of how this program should be run.

DDI #05404-84 19 September 1984

NOTE TO: Director of Central Intelligence

FROM : Deputy Director for Intelligence

SUBJECT: The Attached

- 1. The proposal Al sent you essentially conveyed my recommendations to him. While a small group of us such as you list could profitably judge proposals for production enhancements from people in CIA, I believe other agencies would insist that some representative of theirs be involved in making the decision on proposals involving their employees. I think politically it would be unwise to have a wholly CIA group make decisions on proposals from DIA, NSA, etc. (C)
- 2. It seems to me that for these proposals, therefore, the IPC offers the least bureaucratic approach. Presently, initiatives for production enhancements must be staffed through the home agency bureaucracy, then the IC Staff bureaucracy, then our Comptroller's office and then the DCI/DDCI front offices. They are also reviewed by the IPC. Thus, as you already know, the present system is extremely bureaucratic. (C)
- 3. What I recommended, and what I believe Al is proposing, is that the Community be informed that production enhancement money will be set aside for individual initiatives in keeping with the "In Search of Excellence" program. What you would be proposing is that any analyst in the Community could send an initiative or an idea directly to the IPC without any other staffing and the IPC (on which DIA, NSA and INR are represented at the senior level) could make a decision then and there on whether or not to fund it. There would be a minimum of bureaucracy and the delay would be no more than two to four weeks at the very outside. It would involve the other agencies agreeing to bypass all of their own bureaucracy to allow these proposals to be carried out if approved by the IPC. This seems to me about as clean as we can make it on a Community basis. (C)
- 4. Your suggestion for a group to review initiatives, funding task forces, and so forth, seems to me though a useful

notion in terms of CIA, not just for production enhancement, but for ideas generally. What would you think about a notice going out saying that anyone that has an idea or initiative relating to any aspect of the operation of the Agency could send it directly to you, John or the EXDIR and then a small group of us could meet and make a decision on it in very short order in terms of whether its feasible or not. I doubt that there would be an overwhelming number of ideas coming up but the mere availability of such a direct channel could help overcome the reluctance of some to offer ideas because of the red tape involved. But, again, it seems to me this kind of approach might be considered both more broadly than and separately from the production enhancements. (C)

Director, Intelligence Community Staff  SUBJECT: Follow-up on In Search of Excellence 2  REFERENCE: Your memo, dtd 8 August 84, same subject  1. As we recently briefly discussed, we have received comments on your request regarding paper from the DDI, the CIA Comptroller, and the Director, OSWR. In summary, their comments, as well as my own views, are as follows:  - points regarding the Production Enhancement Initiative Program are valid and we should accommodate them by structuring a new program which will stimulate creative ideas in the production area that can quickly be approved and funded by an unencumbered system with the requisite authority. The new program should begin with a fairly modest funding per year.  - Put the Intelligence Producers Council in charge. Permit the analyst to submit ideas for funding directly to the IPC without the need for other management approval. This approach should meet your objectives of quick turn around and permit implementation approval within a month or so. The IPC should also assume budgetary responsibility for the program.  - Retain the existing Production Enhancement Initiative Program to meet the needs of the exploitation of longer term, institutional ideas. You may wish to task the IPC to conduct a continuing review of the substance and quality of the Program and a recommendation regarding its longer term continuation in its present form.  - Lastly, we recommend you retain the Exceptional Intelligence Analyst Program (EIAP) essentially as it is and initiate requests to Departments and Agencies for 1985 nominations. Since this program is essentially a training program for the development of individual analysts and their skills, it is believed that an annual competitive process is appropriate. (C)
